Plastics and Rubber Processing and Applications **14** (1990) 253–255

CONTENTS OF VOLUME 14

Number 1

Guest Editorial
Thermoplastics: the changing scene 1
JAMES MAXWELL (UK)
Structure of flowing polymer melts: 2. Stretched polyethylene rubber as a model . 7
T. H. STEVENSON, P. J. HENDRA, W. F. MADDAMS, H. A. WILLIS, V. ZICHY & M. E. A. CUDBY (UK)
Field failures of foam-skin high density polyethylene insulation 15
T. N. BOWMER, P. C. WARREN & E. E. HERSHKOWITZ (USA)
Melt strength and rupture frequency in LDPE film blowing 23
J. BECKER, C. KLASON, J. KUBÁT & P. SÁHA (Sweden)
Uniaxial extensional flow of film blowing grade polyethylenes in the very low to high density range 29
DILHAN M. KALYON & DAVID S. CZERWONKA (USA)
Modelling of the release of ethoprophos in water by a polymer device made of a core and a shell. 35
H. DAVID, J. BOUZON & J. M. VERGNAUD (France)
Solid and cellular styrene–butadiene urea filled matrices in agriculture as a means of minimising water pollution 43
SOHAIR I. ABO-ELELA, F. M. HELALY & E. M. ABDEL BARY (Egypt)
Failure induced by stress concentration at rubber–rubber interfaces 49
AMALENDU SARKAR, DEBASHIS DUTTA, SWAPAN MAJUMDAR & ANIL K. BHOWMICK (India)
Short Communication
The spectral and magnetic studies of some first row transition metal complexes of anthranilic acid and assessment of their suitability as anti-static additives for polyethylene 57
J. R. ALLAN, J. G. BONNER & A. R. GARDNER (UK)
International Union of Pure and Applied Chemistry—Macromolecular Chemistry Division (IV): Commission on Macromolecular Nomenclature (IV.1) 61
Forthcoming meetings 63

Number 2

Guest Editorial
Recent applications for polypropylene in electrical and automotive engineering 65
ANTON WEBER (FRG)
Structure of crystalline polymers used in a wire coating process 71
P. J. HENDRA, D. B. MORRIS, H. WILLIS & A. BREWER (UK)
Melting instability phenomena in polymer extrusion 77
J. BECKER, C. KLASON, J. KUBÁT & P. SÁHA (Sweden)
Factors affecting the impact properties of mineral filled polypropylene 85
A. M. RILEY, C. D. PAYNTER, P. M. McGENITY & J. M. ADAMS (UK)
Modelling the cure of epoxy resin heated by liquid oil. Application of the dissipation of heat generated by the reaction 95
A. EL BROUZI, J. BOUZON & J. M. VERGNAUD (France)
Random copolymers with different alpha olefins made by the UNIPOL™ polypropylene process 103
H. K. FICKER & D. A. WALKER (USA,

Plastics and Rubber Processing and Applications (**14**) (1990)—© 1990 The Plastics and Rubber Institute, England. Printed in Great Britain

Effect of short Kevlar fibre reinforcement on the mechanical properties of millable polyurethane vulcanizates 109
SUNIL K. N. KUTTY & GOLOK B. NANDO (India)
Milling behaviour of gum and filled rubbers 119
NALINI R. KUMAR, ANIL K. BHOWMICK & B. R. GUPTA (India)
Forthcoming meetings 127

Number 3

SPECIAL ISSUE: POLYMER PROPERTIES FOR CAD/CAM

Papers presented at the conference on Polymer Properties for CAD/CAM, 13–14 December 1989, City Conference Centre, London, UK

Editor's comments 129
PETER COX (UK)
Guest Editorial
The BPF/BRMA/PEG design data initiative 131
F. J. LOCKETT (UK)
Criteria in determining mechanical properties data for design 137
S. TURNER & G. DEAN (UK)
Prediction of stiffness properties for design of engineering thermoplastics . . 145
R. A. CHIVERS, M. DAVIES, D. R. MOORE, B. SLATER & J. M. SMITH (UK)
A predictive model for creep in thermoplastics. 153
B. E. READ, G. D. DEAN & P. E. TOMLINS (UK)
A design engineer's intelligent system for plastic materials selection. 159
M. AHARI, S. RAI & G. F. SMITH (UK)
Strain limits and maximum service temperatures for thermoplastic materials . . 165
J. ROBERTS (UK)
FEA applied to rubber 171
P. S. OUBRIDGE (UK)
Material models and database interface for finite element analysis 175
W. MICHAELI & U. MOHR-MATUSCHEK (FRG)
The multiaxial elastic behaviour of rubber 183
D. M. TURNER & M. BRENNAN (UK)
Forthcoming meetings 189

Number 4

Guest Editorial
The Leeds/Bradford/Durham IRC in Polymer Science and Technology . . . 191
I. M. WARD (UK)
Effects of the addition of a multiblock copolymer to an incompatible blend . . 195
K. A. H. LINDBERG, M. JOHANSSON & H. E. BERTILSSON (Sweden)
Sliding wear performance of drawn polyetheretherketone (PEEK) 203
O. JACOBS, T. HEITMANN, TH. HOFFMANN (Germany) &
G.-M. WU (USA)
Compatibilization by processing and properties of polycarbonate/nylon 6 blends . 211
J. I. EGUIAZÁBAL & J. NAZÁBAL (Spain)
Transient heat transfer model of blow moulding 219
C. R. H. ECCLES, D. I. ELLIS, P. J. HEGGS & R. WIKTOROWICZ (UK)

Effect of fillers and moulding conditions on properties of self-vulcanisable blends of epoxidised natural rubber and carboxylated nitrile rubber 223
R. ALEX, P. P. DE, N. M. MATHEW & S. K. DE (India)
Use of biological antioxidants as polypropylene stabilizers 235
S. F. LAERMER (USA) & F. NABHOLZ (Switzerland)
Radiation crosslinking of LDPE in the presence of dicumyl peroxide . . . 241
M. MATEEV & M. NIKOLOVA (Bulgaria)
Grafting of maleic anhydride on ABS in the molten state 245
C. CARROT, M. JAZIRI, J. GUILLET & J. F. MAY (France)
Forthcoming meetings 251
